## 紫外线消毒台灯 UV Disinfection Table Lamp

产品型号(product model No.) : XD-SB05-2201

广东亚一半导体应用科技有限公司  
AE Technologies(GD)Co.,Ltd

## 产品使用场景 Product Usage Scenarios

车内消毒  
car disinfection

卫生间消毒  
bathroom disinfection

冰箱消毒  
fridge disinfection

衣柜除螨  
remove mites from wardrobe

橱柜消毒  
cabinet disinfection

宠物间消毒  
pet room disinfection

## 产品参数 product specification

居家 home care | 车载 vehicle | 旅行 travel

Tiny size/use it any time

产品尺寸  
迷你型 人性化设计  
让您随时随地想用就用

额定功率(rated power) : 5W

额定电压(rated voltage) : DC12V

电源电流(supply current) : 0.42A

工作温度(operating temperature) : 20°~40°

湿度(operating Humidity) ≤ 80%

产品尺寸(product size) : 170\*68\*68mm

使用面积(usable area) : ≤ 5m<sup>2</sup>

光源(light source) : 紫外线灯管+臭氧  
(UV light tube+ ozone)

材质(material) : 抗紫外线塑料(UV-resistant plastics)

供电方式power supply : 内置锂电池 (可充电)  
built-in lithium battery (rechargeable)

产品认证(product certification) : FCC 、 CE

执行标准(standard) : GB19258-2012

## 产品包装 product package

延迟启动 定时开闭  
delayed start / timed close

保证在紫外线照射不到的地方，通过臭氧杀菌消毒，无死角。  
To ensure that the place can sterilize through ozone where is out of reach of UV light, no dead angles.

一键杀菌消毒  
One key for sterilization.  
10S启动延迟  
Ten second startup delay.  
自动定时  
automatic timing.  
360全方位净化  
360 all-round decontamination.

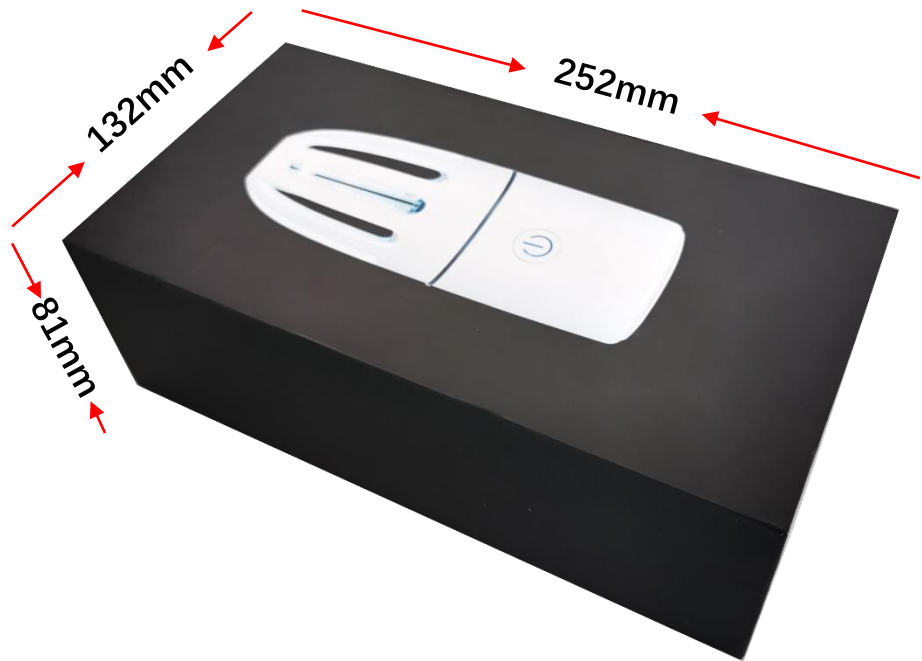

杀菌率99.9%  
Sterilizing rate 99.9%.

除螨率100%  
remove mites rate 100%

净重(net weight ): 300g

毛重(gross weight): 400g

产品尺寸(product size): 170\*68\*68mm

包装尺寸(package size): 252\* 132 \*81mm

**注意事项：**  
**Notice:**

1. 消毒灯开启，场所内的人员、宠物必须离开现场，否则紫外线会对人的眼睛和皮肤造成伤害。  
1. During use of the UV light, people and pets should leave the room, because direct exposure to human eyes and skin is strictly prohibited, in order to avoid injury.
2. 如伤害已发生，不要自行处理，请及时就医。  
2. If injured, do not handle it by yourself. Please seek medical treatment immediately.
3. 紫外线长期使用会造成被照物体褪色，画类等贵重物品请妥善保管。  
3. Long-term use of UV rays can cause discoloration of the illuminated object. Please keep your valuables such as paintings in a safe place.
4. 开启消毒后必须进行通气、通风，特别是带臭氧消毒，要过30-60分钟人员才可以进入。  
4. Ventilation must be carried out after the disinfection function is started, especially for the ozone disinfection function, people can enter the room only after 30-60 minutes.
